CP ENGINE

Introducing our cutting-edge, AI-driven medical receivables engine, designed to safeguard healthcare providers' financial health. Our platform swiftly evaluates the risk profiles of your medical claims, identifying pitfalls and exposures **before** they impact cash flow.

ANALYTICS

Unexpected financial pressure on healthcare systems disrupts revenue and patient care. Providers need **fast, intuitive, low-cost financing options**. We evaluate your exposure risk and match you up with our network of financial institution partners.

HOW IT WORKS:

Value

Reduce your AR Days by up to **50%** for eligible claims without switching your RCM.

Security

Protect your data with our SOC 2 certified, HIPAA-compliant environment.

A.I. Accuracy

Predict claim non-payments with an unparalleled accuracy—up to **98%**!

Financing

Cut your medical receivables borrowing cost by up to **50%**!

LIQUIDITY

Our engine scores medical claims on behalf of the lender. Because our claim evaluation is so accurate, banking partners will lend to you and lower rates. You get these benefits without revealing any sensitive or private patient information.

OUR MISSION

Solvency, practice improvement and patient care are all critical for healthcare providers' long-term financial stability. CP's data-driven technology turns even aged receivables into cash flow, significantly reducing your risk exposure.

How healthy are **your** claims?

CAPITAL PULSE

Where do healthcare providers turn when they **need better financing options**? Our analytics platform provides detailed insights that help optimize your revenue cycle, reduce outstanding receivables, improve cash flow, access low-cost capital, and ensure the financial health of your healthcare organization. **Contact us today** to learn how we can unlock your liquidity!
